

You sell. Darb delivers.

The shop keeps its customers. Darb does everything after the order.

EVERY DELIVERY COSTS THE CUSTOMER 1.250 KWD

1.100 to the delivery company	0.150 to Darb
----------------------------------	------------------

That is it. **Darb earns 150 fils on every single order.** No other fees in the pilot.

HOW ONE ORDER WORKS

- 1 The shop sends the order.** Already priced, already confirmed.
- 2 The nearest driver gets it in 15 seconds.** Says no? The next one gets it.
- 3 The customer watches it live on WhatsApp.** Map, driver, call button. No app.
- 4 A 4-digit PIN proves delivery.** Then the money books itself, to the fils.
